Project Management

From the moment we receive an order, one of our in house project managers is assigned to that project.

Regardless of the size of your requirement every project follows the same process to ensure that it is completed within the requested timescale. Close collaboration and communication through every aspect of the installation is assured to keep you up to speed with the project's progress.

The sales team and project manager discuss and go through the project in detail. This continues on a weekly basis until the project is complete. Our aim is to ensure every project is delivered on time, exactly as requested by our clients and on budget.

To find how we can manage your next project please contact our sales team today

Design

Whether you are a hotelier, architect or interior designer, our services are designed to dovetail with your requirements.

The selection and coordination of fabrics, wall coverings, carpets and furniture can seem daunting and overwhelming.

This is why we work to ensure that you have the widest selection of interior finishes available and professional design advice if required. When refurbishing or creating a new interior it is imperative that stunning results are combined with cost control.

The experience of the GDC design team ensures that the process is made as simple as possible while providing a clear picture for our clients.

We provide professional scheme boards, room layouts and with detailed pricing options for your project. A sample room service is also available if required.

To enquire further regarding costing for these services please do not hesitate to contact a member of our sales team.

Installation

Once our products leave the manufacturing department, we coordinate all items to meet with our installation team working on site.

All our team members are issued with Global Design Concepts and PPE clothing to be worn while working on site. There is a nominated site team leader on every project and the personnel work in harmony with the project manager.

Global Design Concepts employ their own curtain, carpet and furniture fitters to ensure that all work on site is completed to the highest standard. Our fitting teams work to the highest possible safety standards and Global Design Concepts is also audited by an independent health and safety consultant to ensure conformity to current standards.

Wherever your hotel is located you will experience the same customary level of service by our dedicated team.

Bespoke Manufacture

Attention to detail is an essential requirement when it comes to manufacturing.

At Global Design Concepts all our products are manufactured to exacting standards specifically for each individual project. This allows you to add your own signature to your hotel or restaurant area.

Curtains and Furnishings – When manufacturing curtains it is essential that every window is individually measured and the measurements and all relevant details follow the curtain manufacturing procedure. We ensure that a detailed site measurement check is completed following confirmation of every project.

Carpets – At Global Design Concepts, we design and install beautiful commercial carpets of superb durability - with axminster and tufted carpets to suit all hospitality environments. Computer generated printout and hand trial samples are readily available for all bespoke carpet designs.

Our expert fitting team will leave the area ready for use.

Furniture – All of our chairs and sofas are manufactured using Beech hardwood frames. Each frame is assembled using traditional methods to ensure longevity in the most demanding environments. The frames are then upholstered using flame retardant foams and contract fabrics of your choice. We also produce high quality tables, table tops, table frames and bespoke bedroom furniture that not only looks stunning but which stands the test of time in busy commercial environments.

Fabrics & Wall coverings – We at Global Design Concepts promote the use of inherently flame retardant fabrics and wall coverings on all projects. We are constantly sourcing new ranges from companies and mills throughout the world to offer our clients an ever increasing choice.

Headboards & Pelmets – We are now manufacturing all upholstered headboards and pelmet. With our team of upholsterers, this allows us to manufacture headboards and pelmet to any design, size and specification.

Re-Upholstery – Our skilled team of upholsterers are experts at revitalizing your existing furniture. We also re-stain and repair exposed wood to completely renew chairs and sofas.

Our own in house workshop allows us to ensure that quality control is closely monitored on each item produced by Global Design Concepts.
